

As an AMERICAN TRUCK DRIVER, I use the XM services extensively, I can push a button and receive up to date weather and traffic news for many cities without having to wait. Most radio stations you have to wait for the News or the quarter or half hour, or some other formula of events to occur before I can get the information I need. With XM, it is instant, therefore avoiding heavy traffic or accidents. This in turn keeps me rolling (making money) and helps me to deliver my load on time, therefore keeping costs down that will ultimately be passed on to the consumer. In my opinion, the XM Weather/Traffic channels have probably saved countless accidents and lives in the Cities that XM has channels for and I pray that they add many, many, more. Their services are a SAFETY issue, and XM should be commended and praised for their innovative efforts to keep our Highways "SAFE"!

Sadened to say, but, Charles Pickering is my State Representative! I would have thought that he would have more consideration for his constituents, as Trucking is a very, very, very big industry in the state of MISSISSIPPI. We travel nation-wide trying to provide a service for this wonderful land we live in, and it would seem that "our safety" and the safety of all Truck Drivers and the safety of all those that pass us would be the most prominent thing on his mind. Maybe,, he just hasn't considered all that is at stake here, "The Safety of Millions" of both Truck Drivers and Passenger Car Drivers alike!
